

DR KRISTY

GOODWIN

FLOURISHING REMOTELY

*Neuro-Productivity Tactics to
Optimise Your Remote Workday*

Working remotely poses potential pitfalls if we're not working in alignment with our brain and biology- digital burnout, constant digital distractions and an 'always on' culture can put a dent in productivity and derail employees' wellbeing.

In the *Flourishing Remotely* presentation I help employees thrive whilst working remotely. I share brain-based strategies to ensure their productivity is optimised and wellbeing prioritised while working at home during a pandemic.

DR KRISTY WILL EXPLORE:

- // A four-step system to PLAN their WORKDAY as they work from home, or in a hybrid approach;
- // Key BIOLOGICAL MARKERS to maximise their FOCUS and OUTPUT at prime times of the day;
- // How to BUILD A FORTRESS AROUND their FOCUS to minimise unnecessary DIGITAL DISTRACTIONS; and
- // Recognise the importance of DIGITAL DISCONNECTION for peak- performance.

In this 60 minute virtual masterclass delegates will be armed with a menu of micro-habits so they can work remotely *without* sacrificing their productivity, mental wellbeing and/or physical health. Help your employees to thrive online at home and reduce the impact of digital fatigue.
